

Mike Guggemos, Vice President
 Motorola
 2501 South Price Road, MS AZ10/G1132
 Chandler, AZ 85248

Greetings, Mr. Guggemos:

Inside the accompanying box is a device that might take you back a few years – a ViewMaster. We're using it to present a classic story of conflict, villains, heroes and a happy ending. You'll see the mighty city of Motopolis and its struggle against King Pain – the dreaded three-headed beast of the I.T. apocalypse. And you will see how the Motopolis Council of Intelligent Decision Makers calls on the Quest Justice League to defeat the beast to restore order, reduce costs, boost productivity and achieve ROI like never before.

Sure, it sounds like fantasy. But it doesn't have to be. I'm convinced it can be the reality for Motorola, with the help of Quest Software. In fact, we're already providing solutions for Motorola that deliver similar results through efficient management of your Private Radio Network application, robust Java performance tuning,

high-quality Oracle development and seamless Active Directory administration. Plus, we've helped more than 50,000 companies around the world – including 75 percent of the Fortune 500 – get more than they ever thought possible from their I.T. infrastructure.

I'd be grateful for the opportunity to tell you more about our powerful solutions so you can combat "King Pain" and get the most from your I.T. budget. You can reach me via the phone number or e-mail address below.

Very best regards,

Steve "Rush Man" Rush
 National Account Manager for Motorola
 Quest Software
